Stop Medicaid Cuts Now!

Dear Governor Pataki,

We are totally opposed to the Medicaid cuts proposed in your 2005-2006 Executive Budget.

If implemented, these cuts will drastically reduce health care coverage to low-income New Yorkers and reduce the public's access to health care services. We believe you can find other ways to adjust the budget that will not hurt the young, the elderly and disabled so severely.

We also believe you can find budget solutions that will not adversely impact the public health care facilities that provide health care to those who would otherwise go without.

We strongly urge you to restore your proposed cuts to programs that provide a vital safety net for all New Yorkers.
